

NEWS RELEASE

MAJOR BROADCASTERS LAUNCH NEXTGEN TV ON FIVE LOCAL TELEVISION STATIONS IN ST. LOUIS, MO

KDNL-TV, KMOV, KSDK, KTVI and KPLR-TV Begin Broadcasting with New Technology

St. Louis, MO– September 23, 2021 –St. Louis’ leading television stations today began broadcasting with NEXTGEN TV, a revolutionary new digital broadcast technology based on the same fundamental technology as the Internet and digital applications. Today’s launch includes KDNL-TV (ABC), KMOV (CBS), KSDK (NBC), KTVI (FOX) and KPLR-TV (CW).

NEXTGEN TV can support a wide range of features that are currently in development. In addition to providing a new, improved way for broadcasters to reach viewers with advanced emergency alerts, NEXTGEN TV features stunning video with brilliant color, sharper images and deeper contrast to create a more life-like experience.

NEXTGEN TV adds a new dimension to TV viewing, with vibrant video and new Voice+ dialogue enhancement that brings voices to the foreground. Movie theater-quality sound lets viewers hear every voice clearly and keeps volume consistent across channels. NEXTGEN TV also can be enhanced with Internet content to enable viewers to get the most out of live sports, live news, and live events in real-time, without looking away from the TV screen.

Powered by ATSC 3.0, NEXTGEN TV is the most significant broadcast technology upgrade ever. Features available on NEXTGEN TV will vary by device and station as broadcasters roll out service across the country. Antenna viewers without NEXTGEN TV sets can simply rescan their TV sets to ensure uninterrupted service. Rescan instructions are available at: fcc.gov/rescan. Cable and satellite subscribers do not need to take any action.

Today’s launch in St. Louis follows a decade of development and months of planning and preparation by the local stations in the market. Owned by Nexstar Media Inc., KPLR-TV has converted to ATSC 3.0 transmissions and will broadcast both its own programming and the programming of the other participating stations in NEXTGEN TV format. The programming of all the participating stations will continue to be available in the existing DTV format, which can be received on all modern television sets. BitPath, which is developing new data broadcasting services, led the planning process and deployment efforts across the five television stations.

From Seattle, Washington, to Washington, D.C., NEXTGEN TV service is already on the air in more than 30 cities across the country. St. Louis viewers can learn more about NEXTGEN TV by visiting www.WatchNextGenTV.com, which offers a guide listing cities currently carrying the service, as well as links to available NEXTGEN TV set models.
